TOBACCO-FREE COMMUNITY FORUM

1 in 8 high school students currently use a tobacco product – that’s about 3 in every classroom (North Carolina Youth Tobacco Survey, 2022). E-cigarettes continue to be the #1 tobacco product used by youth. Youth tobacco use continues to be a health crisis. The purpose of the Forum is to move the needle and make a healthy difference in the lives of Wake County residents. It’s time to create a healthier Wake County.

The purpose of this FREE, youth-led forum is to continue **working towards a healthier Wake County**. Join us as we:

- Hear from Wake County youth.
- Hear from leading experts on the current trends and health impacts of the vaping epidemic.
- Discuss current and future policies that facilitate tobacco-free environments.
- Create action plans for healthier schools and communities.

Hosted at the WakeMed Andrews Center, this youth-led forum will feature a review of current trends and a discussion of action steps to support tobacco-free environments. Panel will provide opportunities for youth, parents, and community members to participate in conversations about strategies that reduce youth tobacco use and to empower communities.
