

Vaping 101: Family Edition

This program is for families with youth 6th grade and up with their parent/trusted adult

Equip your teen with the facts to resist vaping. The Poe Center's vaping prevention program, Vaping 101: Family Edition, brings youth and parents/caregivers together to explore the latest research on nicotine addiction and its impact on the developing brain and body.

Working as a team through an interactive anti-vaping game, families build vital knowledge and practical skills to confidently navigate substance use pressures and make healthy decisions. Families will leave equipped with valuable tools and resources to support ongoing conversations.

This vaping prevention workshop is designed for youth 6th grade and up with their parent/trusted adult. Space is limited to 25 pairs. Door prizes available!

January 23, 2027
9:00 a.m. - 11:00 a.m.
224 Sunnybrook Road
Raleigh, NC 27610
